

REAL-TIME AND ARCHIVE DATA SERVICES AT ECMWF

D. Jokić

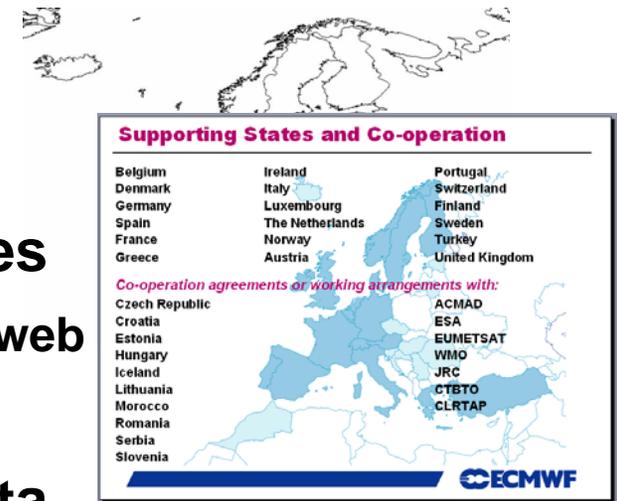

Operations Department - ECMWF

ECMWF data services

- **Background**
- **Definitions and rules**
- **What data services do we provide?**
- **What products are available?**
- **When is data available?**
- **How to get data?**
- **How much does it cost?**
- **How to become a customer?**
- **What support do we provide for customers?**
- **Future plans**

Background

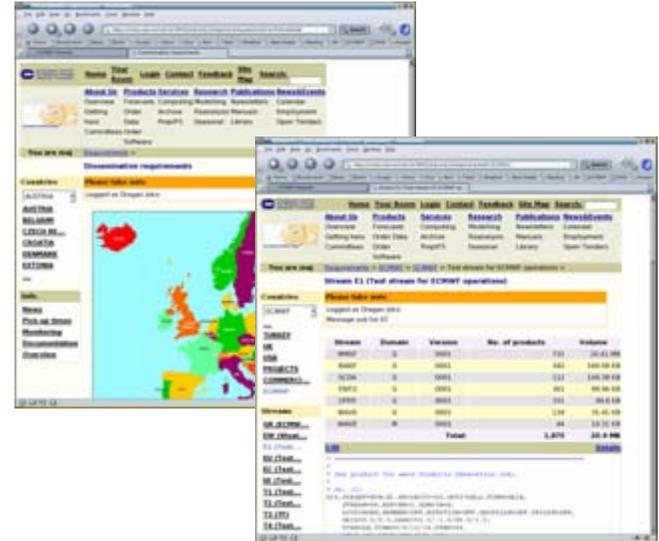

- **ECMWF provides data to Member States**
 - Real-time data through dissemination and web
 - NMSs have open access to archive data
- **ECMWF was allowed to sell archive data**
- **Making ECMWF Real-Time Products commercially available**
 - Increased interest from commercial world
 - Creation of Advisory Committee for Data Policy (at ECMWF)
 - Creation of Data and Services Section
 - Lowering of maximum charge for commercial users
 - Delegation of delivery of data to ECMWF
 - Harmonising rules and costs with ECOMET

ECMWF Data services

● Real-Time

- Dissemination on a daily bases

● Archive data

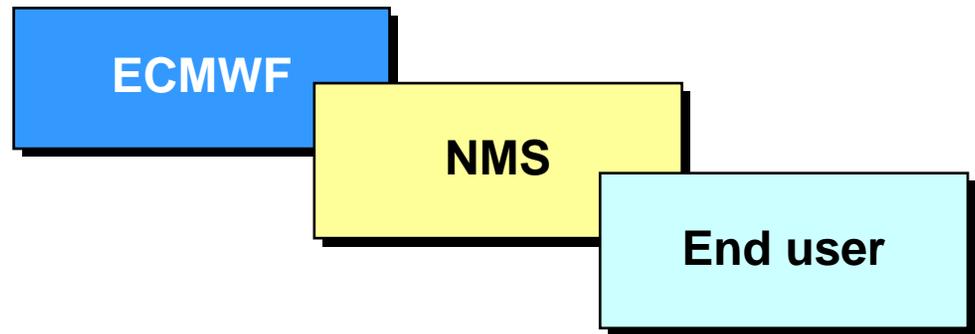

- By order from Data.Services@ecmwf.int
- Direct MARS access (granted to maximum charge commercial customers)

● Web products

- Updated on a daily bases

Definitions

● Users

- Service provider (acquires data to supply Value Added Services)
- End user (uses data for own commercial, industrial or personal purpose)
- Research and education (no re-distribution or Value Added Service)

● Types of products – in line with ECOMET definitions

- Type A Products – raw products
- Value Added Services (VAS) – derived or processed products

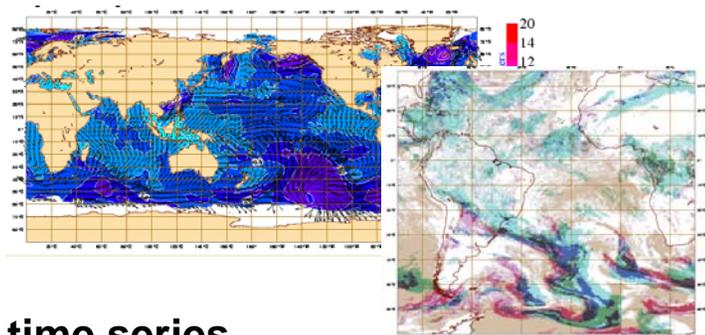

● Licensor – ECMWF or NMS of an ECMWF's Member State or Type 1 Co-operating State

Level playing field

- Rules set by ECMWF Council
- Real-Time Products are available to all users receiving data directly from ECMWF at the same time through
 - Dissemination
 - Web
 - No real-time ('Valid') data is available through direct MARS access
- Commercial arm of NMS is treated as a commercial customer
 - They pay the same price
 - They pay for the data
 - Commercial catalogue applies

Products

● Real-Time

- Data in field form and single point time series
- Products are listed in *The Catalogue of Real-Time Products*
www.ecmwf.int/products/catalogue/

● Archive data

- *Archive Catalogue* contains all operational archived data (including ERA-40,...) www.ecmwf.int/products/data/archive/ECMWF_catalogue/
- All available except valid data (analysis time + step \leq yesterday)
- Observations (limited set)

● Web

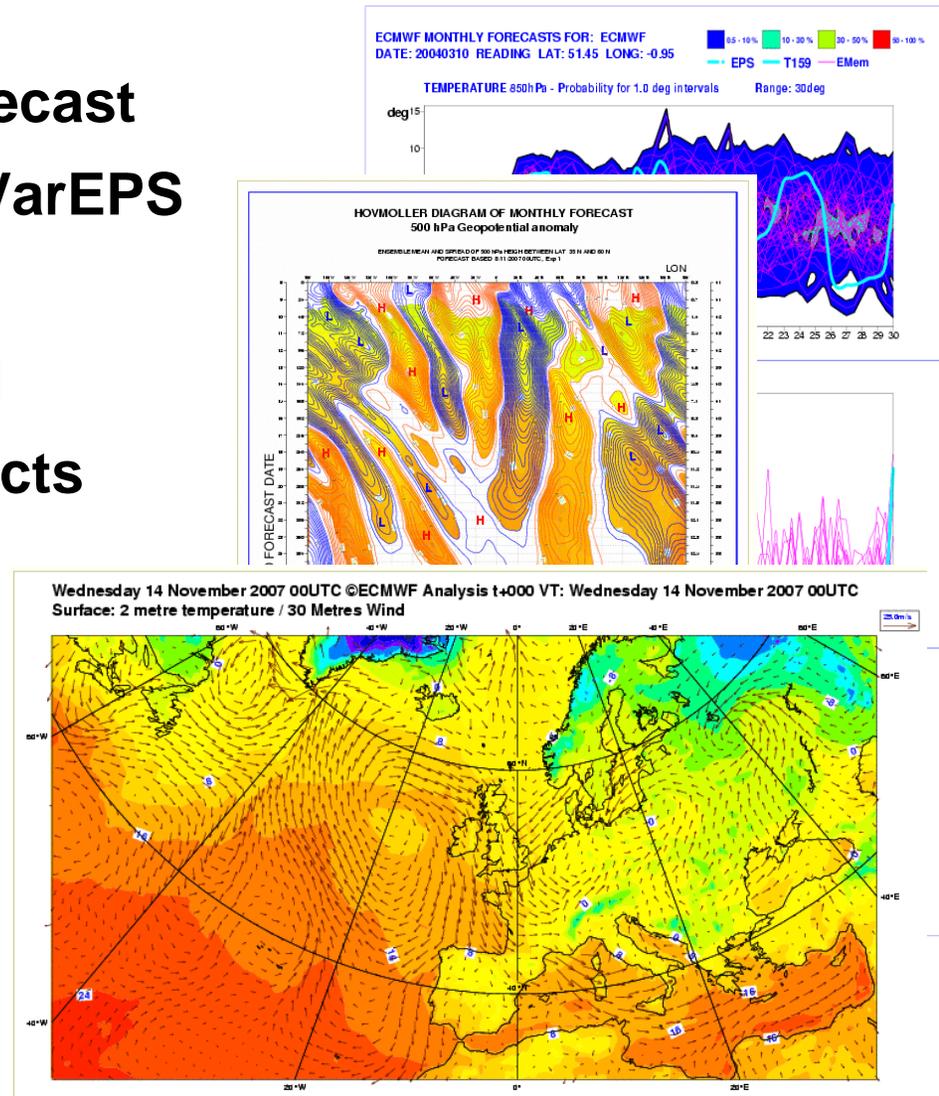

- Products are available on 'As is' bases
- Multi-Images, EPSgrams, Animations, ...

www.ecmwf.int/products/forecasts/d/catalogue_content

Catalogue of Real-Time Products

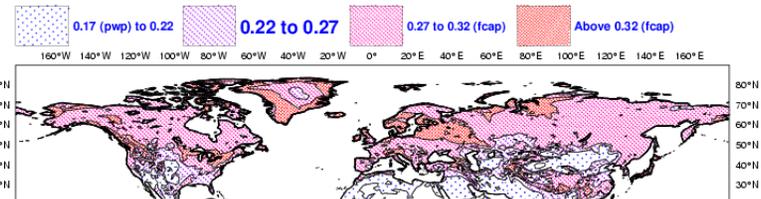

- Main deterministic forecast
- Ensemble Prediction VarEPS
- Global Wave Model
- European Wave Model
- Wave ensemble products
- Seasonal forecast
- Monthly forecast

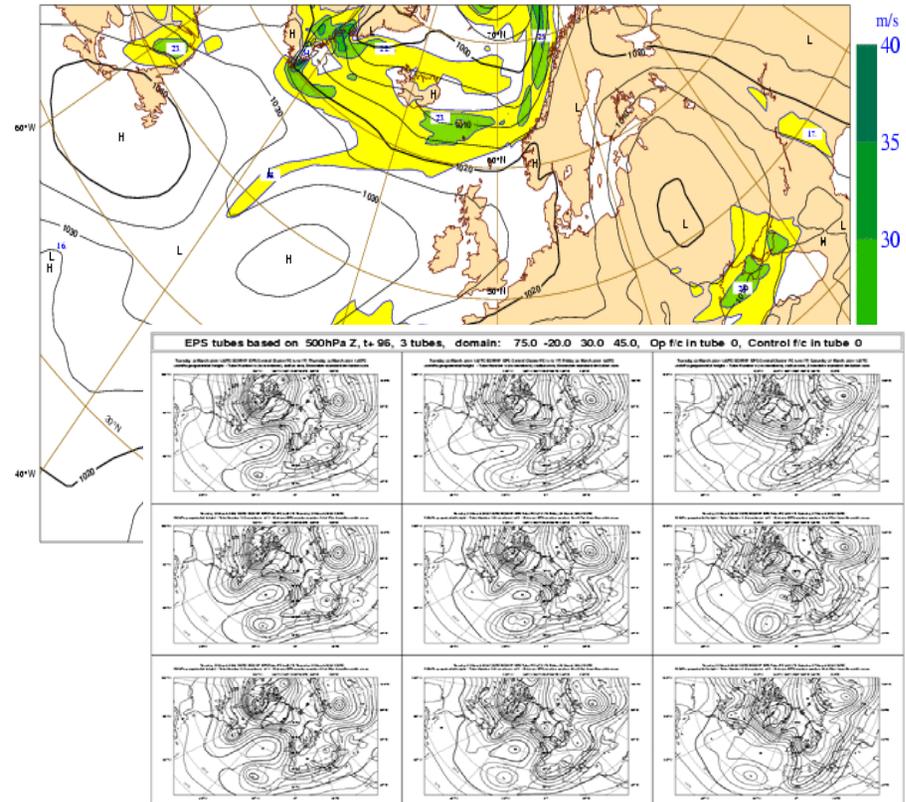

Data types

- Analysis
- Forecast
- Perturbed forecast
- Weather parameter
- Derived data types
 - Forecast probabilities
 - Cluster means
 - Extreme forecast index
 - Anomalies
 - Ensemble means

ECMWF Analysis VT: Tuesday 23 March 2004 12UTC
SURFACE: Integrated soil wetness (layers 1+2+3) (m³/m³)
0.32 (fcap) represent 320 mm of water

Tuesday 23 March 2004 12UTC ECMWF Forecast t+72 VT: Friday 26 March 2004 12UTC 850hPa u-velocity/ mean sea level pressure
SURFACE: MSL Pressure / 850-hPa wind speed

Times and steps

- 00, 06, 12 and 18 UTC based analysis

| | Run | Duration | Frequency |
|--------------------------------------|-------------------------------|-----------------|---|
| Deterministic Global wave | Daily 00UTC, 12UTC | 10 days | 3 hourly up to 72, 6 hourly to 240 |
| VarEPS Wave EPS | Daily 00UTC, 12UTC | 15 days | 6 hourly |
| European wave | Daily 00TC, 12UTC | 5 days | 6 hourly |
| Monthly forecast | Weekly | 1 month | 6/12 hourly |
| Seasonal forecast | Monthly | 7 months | 6/12 hourly |

Vertical levels

- **Model levels**

- **Deterministic L91**
- **EPS L62**

- **Pressure levels**

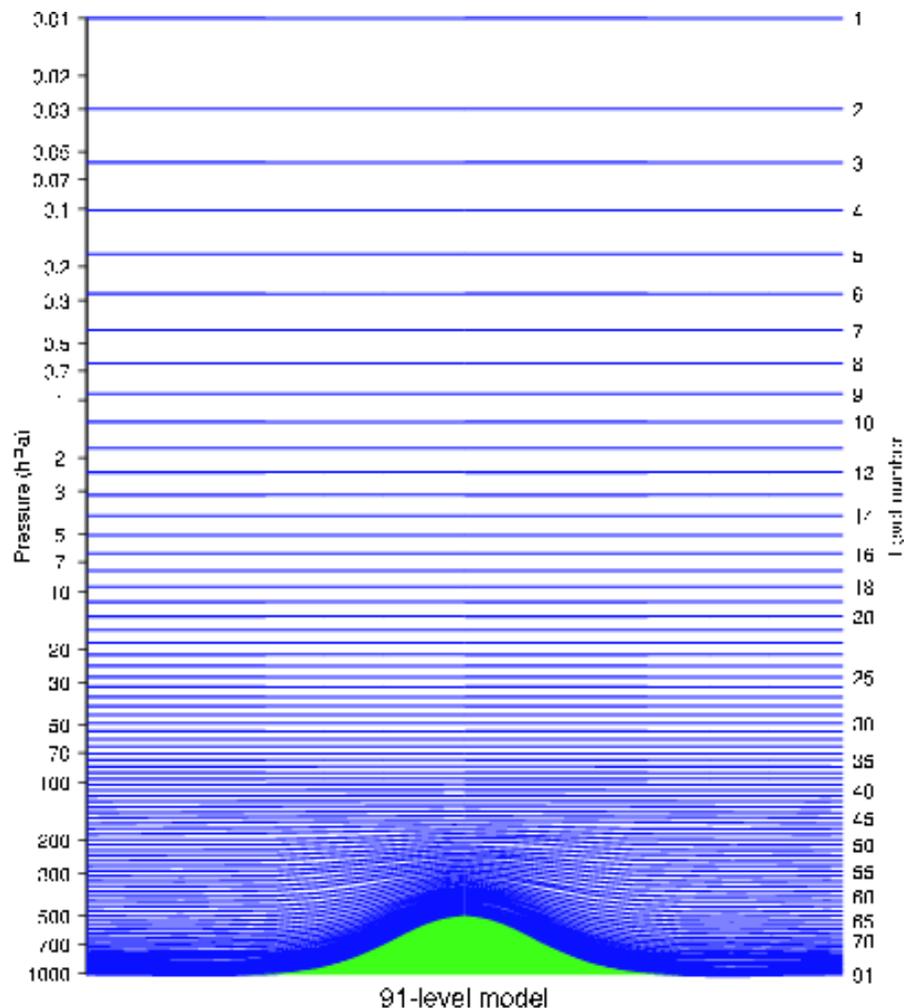

- **Deterministic**

1000 to 10 hPa 15 levels

- **EPS**

1000 to 200 hPa 6 levels

- **Single level parameters**

Data Representation and resolution

| | Spherical harmonics | Gaussian grid | Latitude-Longitude |
|----------------------|---------------------|------------------|--------------------|
| Deterministic | T799 | N400 | 0.25/0.25 |
| VarEPS | T399/T255 | N200/N128 | 0.5/0.5 |
| European Wave | / | / | 0.25/0.25 |
| Monthly | T159 | N80 | 1.5/1.5 |
| Seasonal | T159 | N80 | 1.5/1.5 |

- Any sub-area
- Frames and Bit-map based products

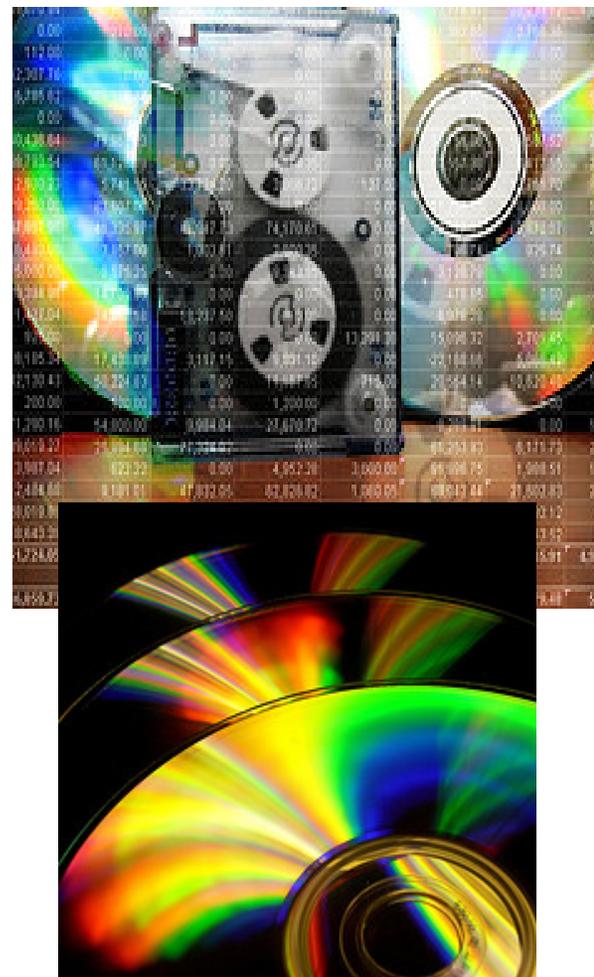

Format

- WMO FM-92 GRIB-1
- WMO FM-94 BUFR
- **GRIB-2**

Media for archive data

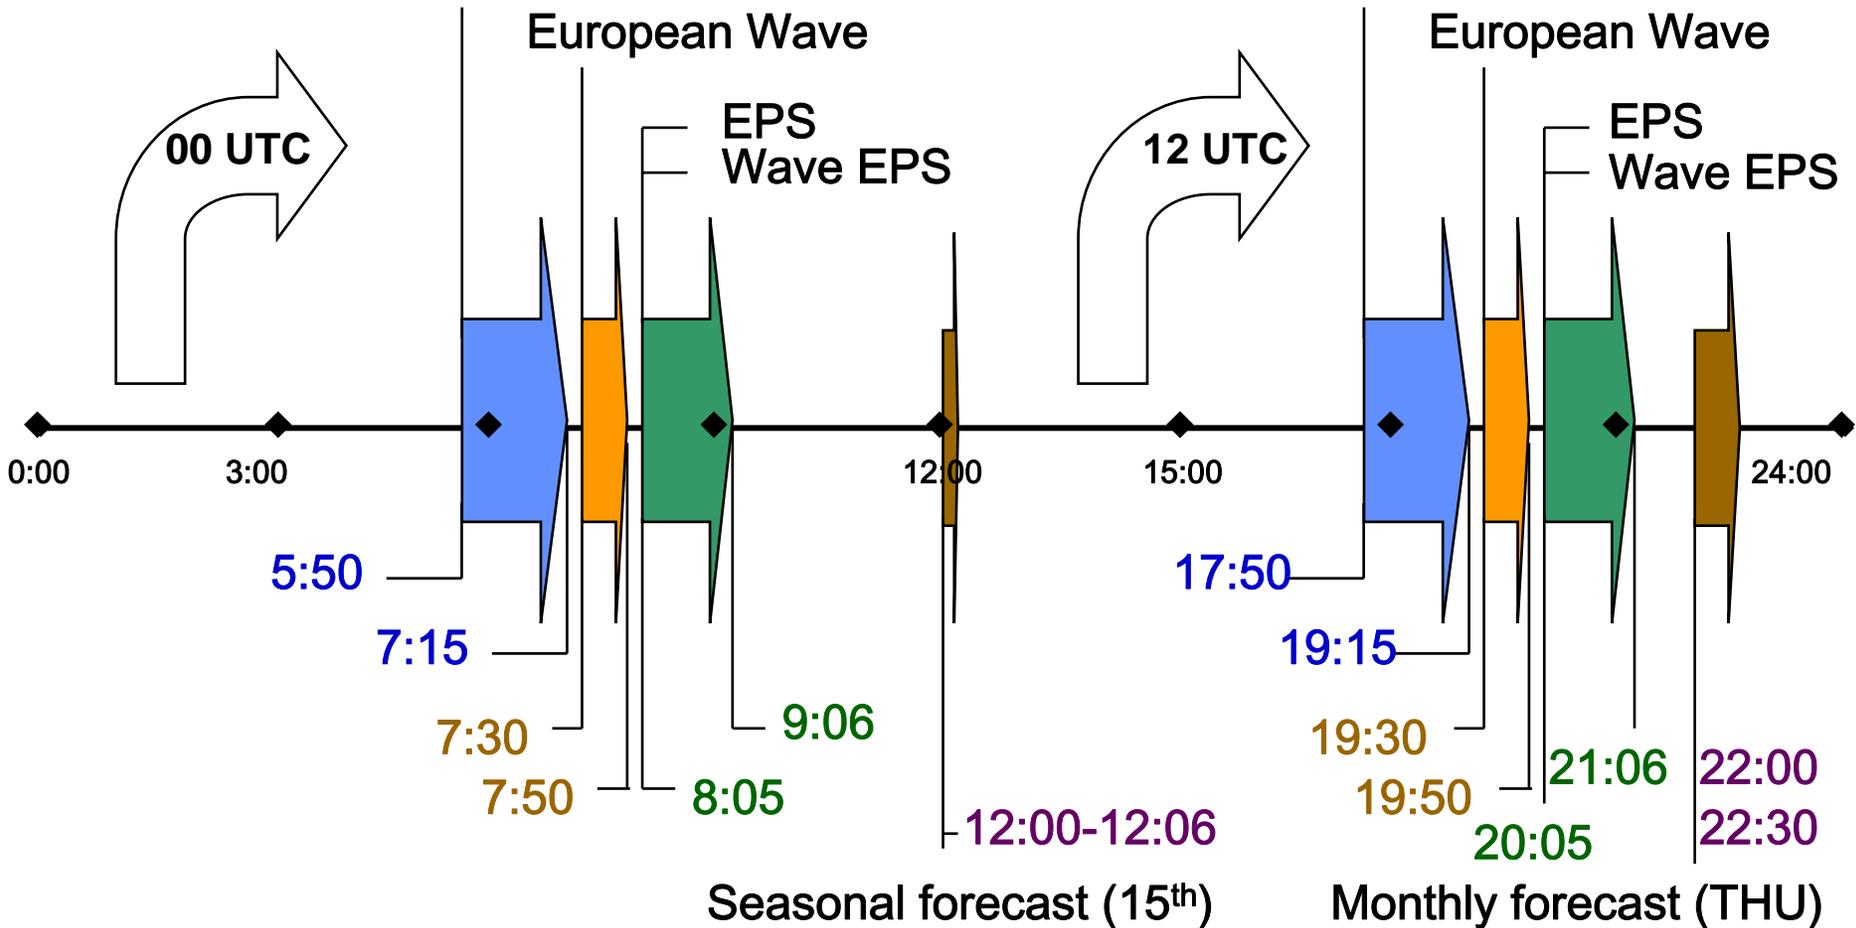

- Tapes SDLT, DDS4, LTO2
- CD, DVD
- USB LaCie
- FTP push, download

Getting Real-Time Products from ECMWF

- **Data can be provided**
 - Over INTERNET (up to 75GB daily at no extra cost)
 - Over dedicated private line (financed by user)
- **ECMWF disseminates products as one file per forecast/analysis time step**
- **Dissemination files have unique names**
- **We push data according to dissemination schedule**
- **Users can**
 - Set transmission priority for each data set
 - Split request into several logical entities - dissemination streams
 - Have backup host configured
 - Chose number of parallel transmissions,

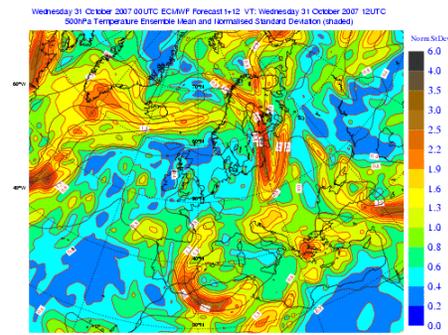

Tariffs

- **Price = Information cost + Handling charge**
- **Information cost**
 - Cost of data – determined by ECMWF Council
- **Handling charge**
 - **Real-Time Products:** Cost of labour, computer resources and network
 - **Archive data:** Cost of labour, retrieval, post-processing, postage and media
- **Type of user**
 - Research or non-research
- **Handling charge is determined by Licensor**

Information cost

- **Costing formula based on the ratio between resolution of the current operational deterministic model and the resolution and area requested**
- **Cost differs for Real-Time and Archive data for the ‘Valid factor’**
 - Valid factor is 1 for Real-Time Products
 - Valid factor is 0.2 for Archive data
- **Same from NMS or ECMWF**
- **No information charge for research and educational users**

Handling charge - Archive data

- **If data is supplied by ECMWF**

- **Costing formula includes two factors**
 - **Number of requested days – factor different for each data set**
 - **Volume of requested products**
- **The cost of media is fixed for any amount (except for USB LaCie) and is inclusive of postage**
- **Minimum handling charge applies**

www.ecmwf.int/products/data/archive/charges/handling_charge.html

- **If data is supplied by NMS**

- **NMS's handling charge applies**

- **Some NMSs do not provide archive data service but delegate provision of archive data to ECMWF**

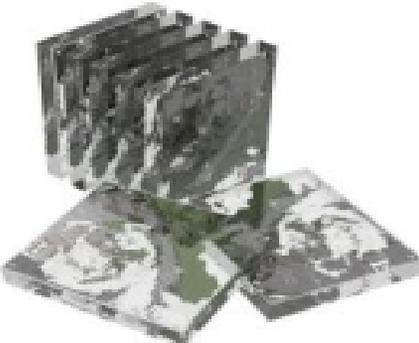

Handling charge - Real-Time Products

- **If Licensor is ECMWF**

- Support fee + Contract and Set-up fees
- Some fees are waived for maximum charge customers
- More information from Data.Services@ecmwf.int

- **If licensor is NMS of an ECMWF's Member State**

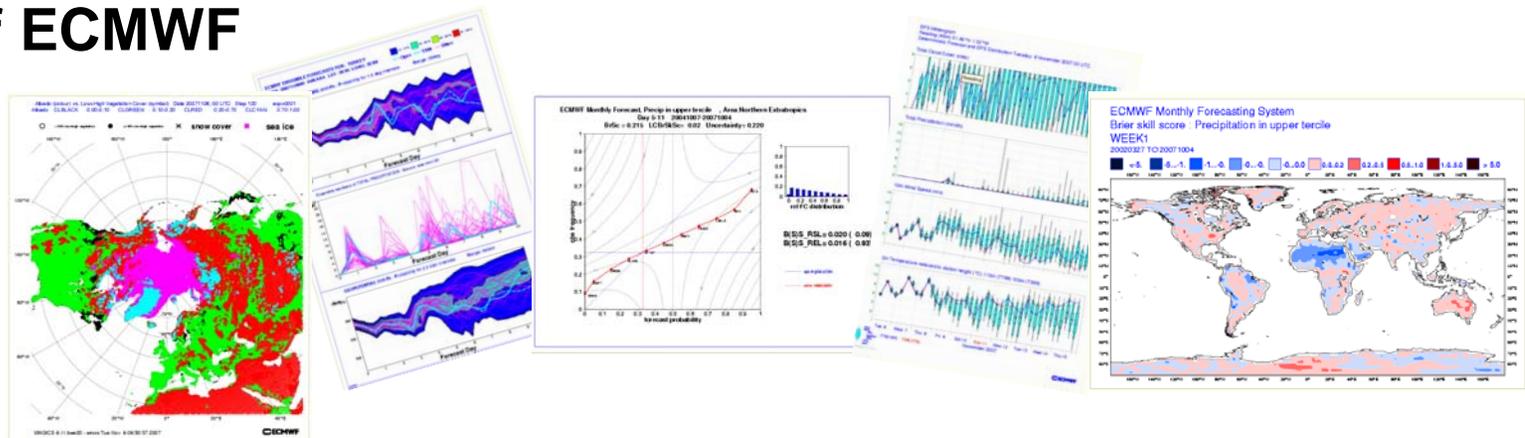

- NMS's handling charge applies

| Licensor | ECMWF | NMS | NMS |
|---------------|-------------------------|-------|-----|
| Deliverer | ECMWF | ECMWF | NMS |
| Contract fee* | ECMWF | ECMWF | NMS |
| Contract | 2 - | | |
| | n/a | n/a | n/a |
| | n/a | n/a | n/a |
| | EUR | n/a | n/a |
| | rge | n/a | n/a |
| | cluded in support fee) | | |
| | ar for each GB | | |
| | 5GB threshold | | |
| | arately based on a | | |
| | ...um charge costumers. | | |

Web products tariff

- The price is EUR 28,000 per year
- Web products are available 'as whole'
- On 'as is' bases
- No download
- For maximum charge customers web cost is included in the price
- Products can be added or discontinued at the discretion of ECMWF

Maximum charge customer

- **Price per year is sum of**
 - EUR 140,000 information cost and
 - Licensor's handling charge
- **Daily real-time dissemination of up to 75GB at no extra cost if data provided over Internet**
- **Access to web products included**
- **Direct access to MARS included**
- **Open access to all products in the catalogue**
- **Can change Real-Time Products request over time to suit their changing needs and get test data**

How to become user of ECMWF Data Services

- **Within ECMWF territory**

- Via NMS of an ECMWF's Member State or Type 1 Co-operating State

- **Outside ECMWF territory**

- Directly to ECMWF Data.Services@ecmwf.int
- Via NMS of an ECMWF's Member State or Type 1 Co-operating State

- **For information**

- Go to www.ecmwf.int/products/data/
 - Browse the products, try the costing yourself, ...
- Send e-mail to Data.Services@ecmwf.int
 - To ask for more detailed information, to start the procedure, to organise free trial, to get data, ...

Support that we provide

- **For users receiving Real-Time Products directly from ECMWF including delegated delivery**
- **Operational 24/7 Call-Desk support as for Member States**
- **We inform customers of**
 - **Scheduled/non-scheduled interruptions to the service**
 - **Forthcoming Model changes effecting data sets**
- **One week free trial for web data service for prospective customers**

| Telephone | email |
|------------------|--|
| +44 118 9499 303 | calldesk@ecmwf.int |

Future

- **For maximum charge customers extend our on-line dissemination system to provide same support as for Member States**
 - **Access and change dissemination requirements**
 - **Control transmission**
 - **Do testing**

- **Further expand and improve on-line costing system for archive data**

Thank you
