

## Definitions

### ● Users

- Service provider (acquires data to supply Value Added Services)
- End user (uses data for own commercial, industrial or personal purpose)
- Research and education (no re-distribution or Value Added Service)

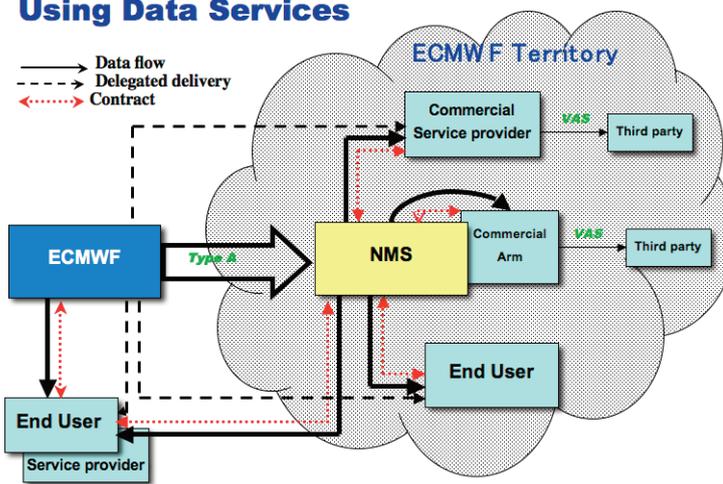

### ● Types of products – in line with ECOMET definitions

- Type A Products – raw products
- Value Added Services (VAS) – derived or processed products

### ● Licensor – ECMWF or NMS of an ECMWF's Member State or Type 1 Co-operating State

## Using Data Services

- Data flow
- - - Delegated delivery
- ← - - - Contract

## Level playing field

- Rules set by ECMWF Council
- Real-Time Products are available to all users receiving data directly from ECMWF at the same time through
  - Dissemination
  - Web
  - No real-time ('Valid') data is available through direct MARS access
- Commercial arm of NMS is treated as a commercial customer
  - They pay the same price
  - They pay for the data
  - Commercial catalogue applies

## Products

### ● Real-Time

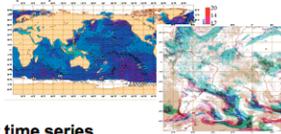

- Data in field form and single point time series
- Products are listed in *The Catalogue of Real-Time Products* [www.ecmwf.int/products/catalogue/](http://www.ecmwf.int/products/catalogue/)

### ● Archive data

- *Archive Catalogue* contains all operational archived data (including ERA-40,...) [www.ecmwf.int/products/data/archive/ECMWF\\_catalogue/](http://www.ecmwf.int/products/data/archive/ECMWF_catalogue/)
- All available except valid data (analysis time + step <= yesterday)
- Observations (limited set)

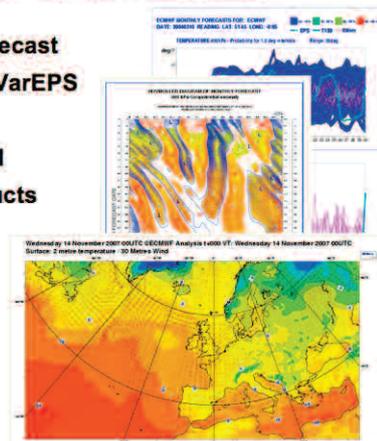

### ● Web

- Products are available on 'As is' bases
  - Multi-Images, EPSgrams, Animations, ...
- [www.ecmwf.int/products/forecasts/d/catalogue\\_content](http://www.ecmwf.int/products/forecasts/d/catalogue_content)

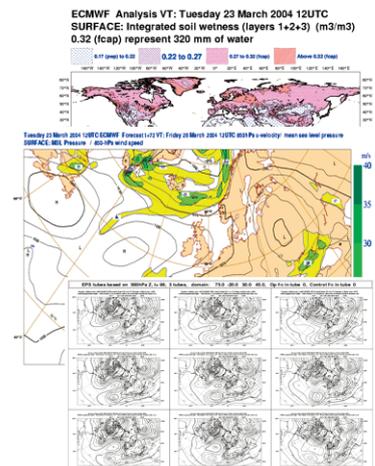

## Catalogue of Real-Time Products

- Main deterministic forecast
- Ensemble Prediction VarEPS
- Global Wave Model
- European Wave Model
- Wave ensemble products
- Seasonal forecast
- Monthly forecast

## Data types

- Analysis
- Forecast
- Perturbed forecast
- Weather parameter
- Derived data types
  - Forecast probabilities
  - Cluster means
  - Extreme forecast index
  - Anomalies
  - Ensemble means

## Times and steps

- 00, 06, 12 and 18 UTC based analysis

	Run	Duration	Frequency
<b>Deterministic Global wave</b>	Daily 00UTC, 12UTC	10 days	3 hourly up to 72, 6 hourly to 240
<b>VarEPS Wave EPS</b>	Daily 00UTC, 12UTC	15 days	6 hourly
<b>European wave</b>	Daily 00TC, 12UTC	5 days	6 hourly
<b>Monthly forecast</b>	Weekly	1 month	6/12 hourly
<b>Seasonal forecast</b>	Monthly	7 months	6/12 hourly

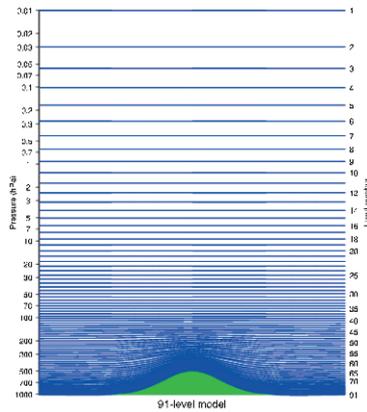

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 11

## Vertical levels

- **Model levels**
  - Deterministic L91
  - EPS L62
- **Pressure levels**
  - Deterministic  
1000 to 10 hPa 15 levels
  - EPS  
1000 to 200 hPa 6 levels
- **Single level parameters**

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 12

## Data Representation and resolution

	Spherical harmonics	Gaussian grid	Latitude-Longitude
<b>Deterministic</b>	<b>T799</b>	<b>N400</b>	<b>0.25/0.25</b>
<b>VarEPS</b>	<b>T399/T255</b>	<b>N200/N128</b>	<b>0.5/0.5</b>
<b>European Wave</b>	/	/	<b>0.25/0.25</b>
<b>Monthly</b>	<b>T159</b>	<b>N80</b>	<b>1.5/1.5</b>
<b>Seasonal</b>	<b>T159</b>	<b>N80</b>	<b>1.5/1.5</b>

- Any sub-area
- Frames and Bit-map based products

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 13

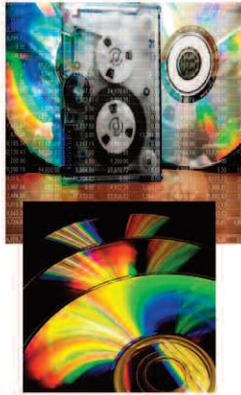

## Format

- WMO FM-92 GRIB-1
- WMO FM-94 BUFR
- GRIB-2

## Media for archive data

- Tapes SDLT, DDS4, LTO2
- CD, DVD
- USB LaCie
- FTP push, download

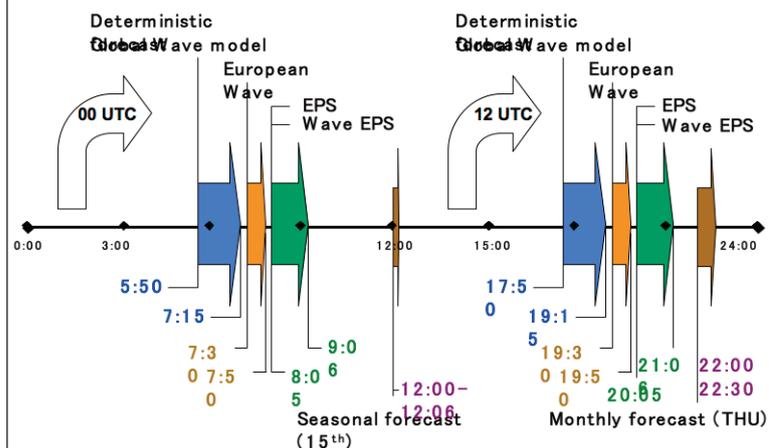

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 14

## Current Real-time data Dissemination schedule

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 15

## Getting Real-Time Products from ECMWF

- Data can be provided
  - Over INTERNET (up to 75GB daily at no extra cost)
  - Over dedicated private line (financed by user)
- ECMWF disseminates products as one file per forecast/analysis time step
- Dissemination files have unique names
- We push data according to dissemination schedule
- Users can
  - Set transmission priority for each data set
  - Split request into several logical entities - dissemination streams
  - Have backup host configured
  - Chose number of parallel transmissions, .....

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 16

## Tariffs

- **Price = Information cost + Handling charge**
- **Information cost**
  - Cost of data – determined by ECMWF Council
- **Handling charge**
  - **Real-Time Products:** Cost of labour, computer resources and network
  - **Archive data:** Cost of labour, retrieval, post-processing, postage and media
- **Type of user**
  - Research or non-research
- **Handling charge is determined by Licensor**

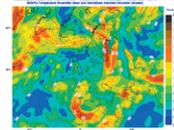

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 17

## Information cost

- **Costing formula based on the ratio between resolution of the current operational deterministic model and the resolution and area requested**
- **Cost differs for Real-Time and Archive data for the 'Valid factor'**
  - Valid factor is 1 for Real-Time Products
  - Valid factor is 0.2 for Archive data
- **Same from NMS or ECMWF**
- **No information charge for research and educational users**

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 18

## Handling charge - Archive data

- **If data is supplied by ECMWF**
  - Costing formula includes two factors
    - Number of requested days – factor different for each data set
    - Volume of requested products
  - The cost of media is fixed for any amount (except for USB LaCie) and is inclusive of postage
  - Minimum handling charge applies

[www.ecmwf.int/products/data/archive/charges/handling\\_charge.html](http://www.ecmwf.int/products/data/archive/charges/handling_charge.html)
- **If data is supplied by NMS**
  - NMS's handling charge applies
- **Some NMSs do not provide archive data service but delegate provision of archive data to ECMWF**

11<sup>th</sup> Workshop on Meteorological Operational Systems - November 2007

Slide 19

## How to become user of ECMWF Data Services

- **Within ECMWF territory**
  - Via NMS of an ECMWF's Member State or Type 1 Co-operating State
- **Outside ECMWF territory**
  - Directly to ECMWF [Data.Services@ecmwf.int](mailto:Data.Services@ecmwf.int)
  - Via NMS of an ECMWF's Member State or Type 1 Co-operating State
- **For information**
  - Go to [www.ecmwf.int/products/data/](http://www.ecmwf.int/products/data/)
    - Browse the products, try the costing yourself, ...
  - Send e-mail to [Data.Services@ecmwf.int](mailto:Data.Services@ecmwf.int)
    - To ask for more detailed information, to start the procedure, to organise free trial, to get data, ...

## Support that we provide

- **For users receiving Real-Time Products directly from ECMWF including delegated delivery**
- **Operational 24/7 Call-Desk support as for Member States**
- **We inform customers of**
  - Scheduled/non-scheduled interruptions to the service
  - Forthcoming Model changes effecting data sets
- **One week free trial for web data service for prospective customers**

Telephone	email
+44 118 9499 303	<a href="mailto:calldesk@ecmwf.int">calldesk@ecmwf.int</a>

## Future

- **For maximum charge customers extend our on-line dissemination system to provide same support as for Member States**
  - Access and change dissemination requirements
  - Control transmission
  - Do testing
- **Further expand and improve on-line costing system for archive data**
