# OGC Standards

EGOWS 2010 ECWMMF, Reading, 2010/06/1-4

Chris Little [chris.little@metoffice.gov.uk](mailto:chris.little@metoffice.gov.uk) +44 1392 886278

OGC Co-Chair Meteorology & Oceanography Domain Working Group

# Apologies & Disclaimers

I speak too fast

No pictures

I was involved in international standards

- ISO
- WMO

View of the OGC 'landscape'

- 'Valleys & hills'
- NOT 'Turn 3<sup>rd</sup> left after pub'

# Structure of Talk

- Some Background
- Why OGC?
- Standards
- Issues for Meteorology

Met Office

# OGC Standards

## Some Background

Met Office

# OGC Met Ocean DWG

2007: ECMWF 11<sup>th</sup> Workshop on Meteorological Operational Systems

- recommended:

2008: ECMWF-OGC Workshop on Use of GIS/OGC Standards in Meteorology

- recommended:

- Establish OGC Met Domain WG
- Establish WMO-OGC Memorandum of Understanding
- Develop WMS meteorological profile
- Develop core models and registries
- Interoperability test beds for met. data & visualization
- OGC web services

# OGC Who?

- Open Geospatial Consortium <http://opengeospatial.org>
- Non-profit making
- Standards setting <http://opengeospatial.org/standards>
- Global
- >400 members <http://opengeospatial.org/members>
  - Industry
  - Government bodies
  - Academia
  - Individuals

# OGC How?

**TC - Technical Conference, 4 days every 3 months**

- Darmstadt Sept 2009 EUMETSAT
- Mountainview Dec 2009 Google
- Frascati Mar 2010 ESA

**SWG - Standards Working Groups, ~24,**

- Fast track to ISO, short lived, 'vertical'

**DWG - Domain Working Groups, ~27**

- Cross-cutting, longer lived, 'horizontal'

**IE – Interoperability Experiments**

- 6 monthly cycle

**Management structure, OAB, open & closed**

Met Office

# OGC What?

OGC Engineering Reports, Discussion papers

OGC Best Practices

OGC Standards :

- GML Geographical Mark-up Language
- WFS Web Feature Service
- WMS Web Map Service
- Etc

Then ISO Standards:

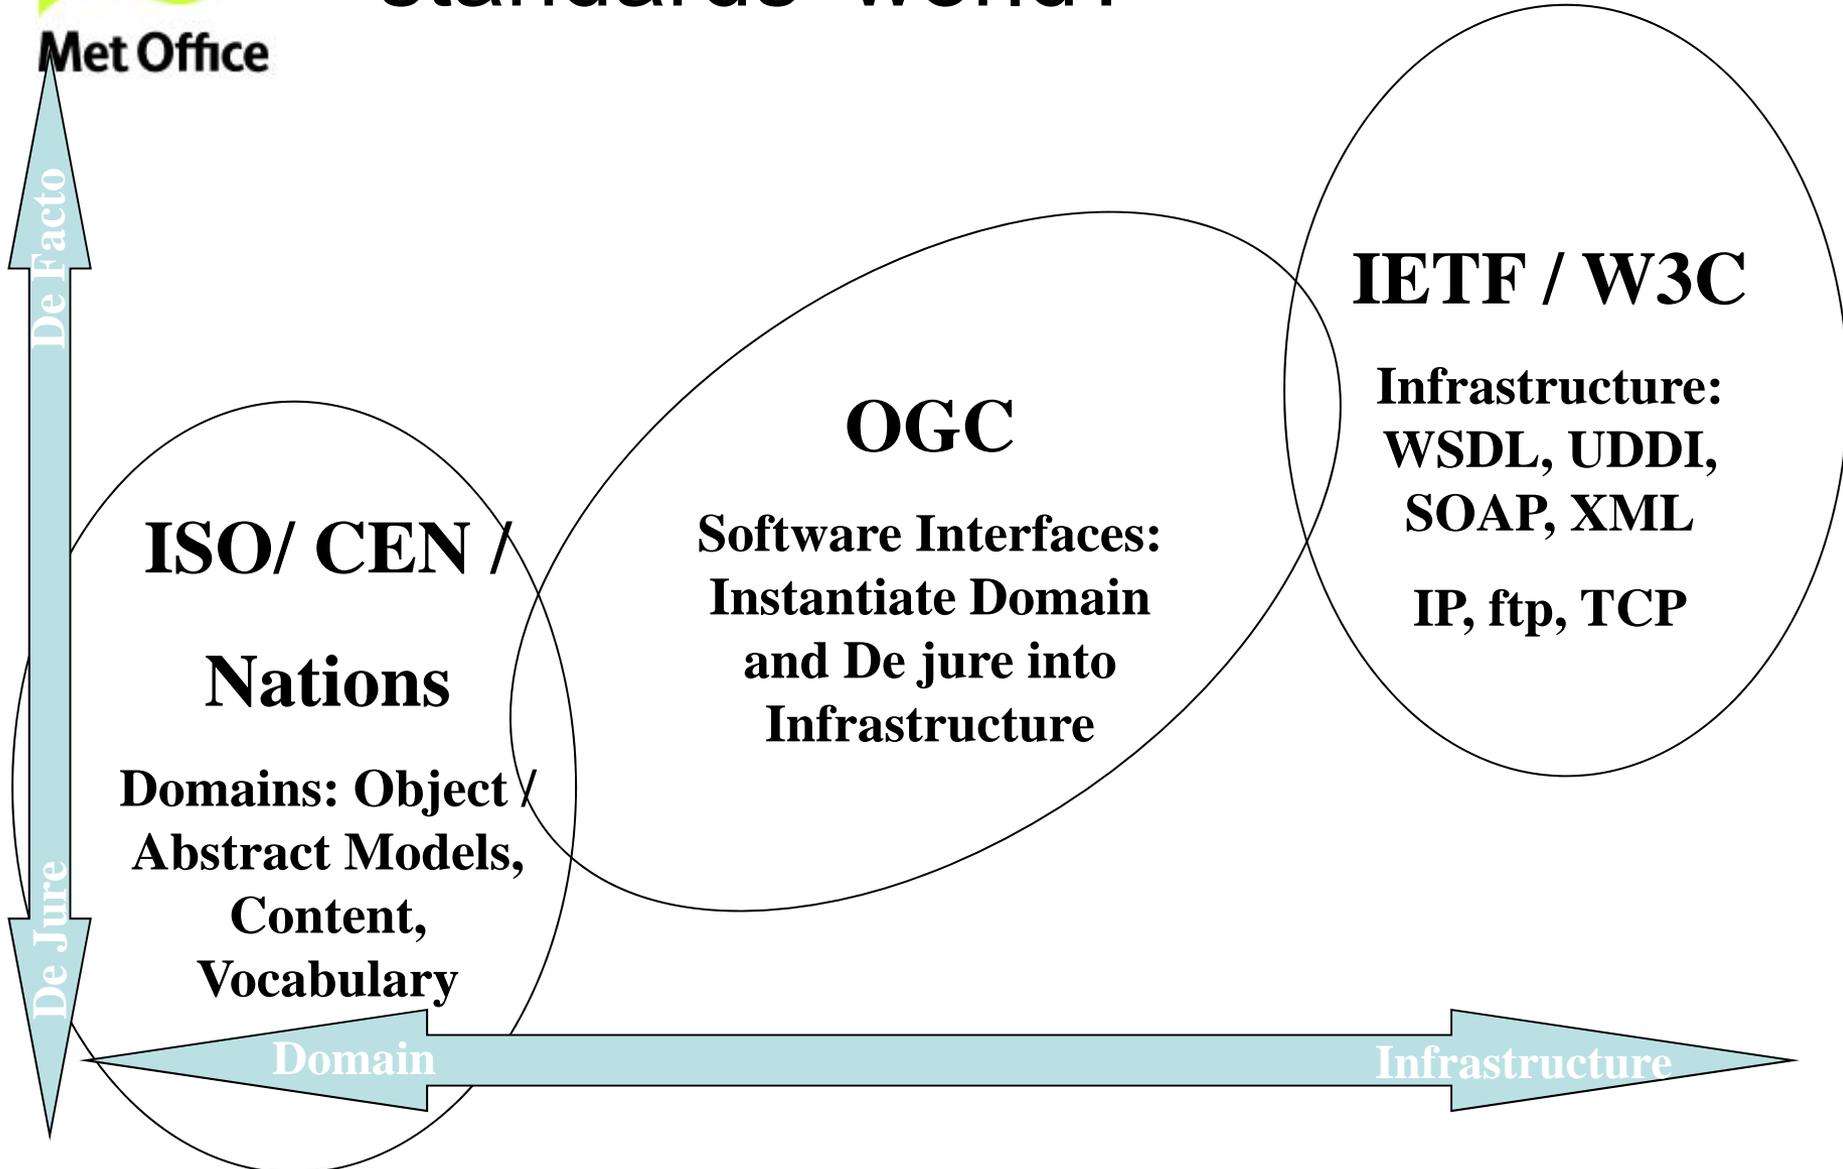

- 191xx
- Etc

Then WMO can use them, willing or not (Inspire)

Met Office

# Where does OGC fit in the 'standards' world?

Met Office

# OWS Common Specification 1.1

Specifies many of the aspects that are, or should be, common to all, or multiple, OGC Web Service interface Implementation Specifications.

These currently include:

- Web Map Service (WMS),
- Web Feature Service (WFS),
- Web Coverage Service (WCS).

Common aspects include:

- Operation request & response contents;
- Parameters included in operation requests & responses;
- Encoding of operation requests & responses.

# Coordinate Reference System (CRS)

Used in all OGC interface specifications

A common & consistent way to define interfaces & interface content (parameters, KVPs, etc) for general positioning, coordinate systems, & coordinate transformations.

- Grounded in ISO TC 211 work as the abstract model.

Currently using EPSG as the authority for CRS parameters.

- Defines thousands of reference systems
- normative reference for the EPSG database is [www.ihenergy.com/Epsg\\_v61.zip](http://www.ihenergy.com/Epsg_v61.zip).

An OGC CRS Registry: <http://crs.opengis.org/crsportal/index.html>

- GML 3 encoding of the entire EPSG v6.1 CRS database

## OGC Request

### OGC Seeks Comments on Candidate GeoAPI 3.0 Interface Standard

**Status:**

**Please note:** This Request is scheduled to close on 1 May 2010.

**Description:**

The Open Geospatial Consortium, Inc. (OGC®) seeks public comment on the candidate OGC GeoAPI 3.0 Application Programming Interface.

The GeoAPI standard provides a set of Java language interfaces based on the ISO 19100 series of geospatial abstract models for metadata and feature geometry as well as two OGC Abstract Specifications for metadata and coordinate reference systems. In addition to producing this set of Java language interfaces, the OGC GeoAPI 3.0 Standards Working Group is producing a test suite through which developers implementing the Java interfaces can test their implementations.

The GeoAPI project emerges from the earlier OGC Geographic Objects effort and is the result of the collaboration of participants from various institutions and software communities. The GeoAPI project's goal is to provide a set of interfaces in the Java language to help software projects produce high quality geospatial software. This work is not expected to cover all OGC standards.

The candidate OGC GeoAPI 3.0 Interface Standard and information on submitting comments on this document are available below. The public comment period closes on 1 May 2010.

**Downloads:**

-  [GeoAPI 3.0 Application Programming Interface](#)
-  [GeoAPI 3.0 Application Programming Interface \(Complete Package, including the PDF document, geoap-2.3-M7.jar, and geoap-2.3-M7-sources.jar\)](#)

**Comment:**

Comments can be submitted to a dedicated email reflector for a thirty day period ending on the "Close request date" listed above, Comments received will be consolidated and reviewed by OGC members for incorporation into the document. Please submit your comments using the following link: [Click here to submit comments](#) The link provided above should include a standard template in the message body. If the preloaded message body does not work properly using your mail client, please refer to the following template for the message body: [Comments Template](#)

## Change Requests

Change Requests are submitted by anyone for any existing or proposed OpenGIS® Standard. The process for public submission of Change Request is rather simple:

1. Visit the **On-line Change Request Form**.
2. Follow the Instructions on the form
  - o Submitter Contact Information
  - o Confirmation of Submitter Information
  - o Input of Change Request
3. The Change Request will be reviewed (by OGC Staff/SWG)
4. Change Request will be posted to the page below

Met Office

# OGS Standards

# Issues and Trends

# WMO / Met Ocean DWG Interests

## WMS – Currently Proactive

- Time – 4 proposals now documented. IE being planned
- Elevation
- Map Projections
- SLD/SE – Aviation SigWx and standard WMO Plots Use Cases
- Tiling – WMTS now a separate standard – jigsaw edges

## Conceptual Modelling - Currently Proactive

- WXXM

## WCS/WFS – lots of ‘churn’ - Currently Reactive

- 4D, CRS,
- payload formats,
- vector vs raster

## O&M, SWE increasing in importance - Currently Passive

Met Office

## OGC Activity now

WMS1.3 -> 1.4 / 2.0 + WMTS 1.0

WCS 2.0 -> 3.0

CSW 2.0.2 -> 3.0

GML 3.1/3.2 -> 3.3

Lots in O&M, SWE

Lots on validation, controlled vocabularies

Met Office

# WMO / Met Ocean DWG **NOT** Interested ?

GeoXAMCL – security at detailed feature level

CityGML – city and building modelling

OpenLS - Location Services ??

WPS - Web Processing Service ??

Etc

# OGC Strategies

- Restructuring standards to 'Core + Extensions'
- Moving from KVP Client/Server API to RESTful http based
- Keep using [Interoperability Experiments and Test Beds](#) Service (WFS 1.1)
- Scenario and Use Case driven
- Establishing naming and validation chains
- Expanding from US based to European to global
- Expanding out of traditional GIS communities
- Follow the money!

Met Office

# Some issues for Meteorology

De Facto vs. De Jure standards

Vendor lock-in vs. Ease of implementation/use

RESTful vs. Tightly coupled

Rate of change vs. stability & sustainability

CSW vs. ISO23950+SRU1.2 (WMO standard)  
vs. OpenSearch

2D map vs. 4D+ hypercube

Met Office

# Questions & Answers ?

# Challenges for OGC standards in Meteorology

Long history of interoperability at human/paper level  
Spatial & Temporal, 2D, 3D, 4+D, constantly changing  
Not Mbytes, but GB, TB and PetaBytes.

Irregular time intervals

Timescales: hours,..., seasons,..., centuries, + & -

Multiple Time attributes

'Regular' grids are not always

Continual change of coordinate systems & projecting  
Eulerian versus Lagrangian viewpoints

Vertical coordinates

Cross-sections, height-time diagrams, T/φs, etc

Ensembles: probabilistic distributions

Significant 'Objects', features of interest

# Met Ocean Domain Working Group

## Workshop on the Use of GIS/OGC Standards in Meteorology

- ECMWF, 2008-11-24/26
- Review the use of OGC (Open Geospatial Consortium) standards in geosciences in Europe and worldwide
- Promote collaboration between meteorological services in order to define a set of common standards that will enhance interoperability
- Recommended OGC involvement and Met DWG
- Established major theme: Web Map Services interoperability for National Met Services

Meteorology DWG established 2009-03 at OGC Technical Conference, Athens

Met DWG converted to Met Ocean DWG, 2009-09 at OGC TC, Darmstadt

MoU with WMO signed 2009-11

## Second Workshop on the Use of GIS/OGC Standards in Meteorology:

- Toulouse, 2009-11-23/25
- Established second major work theme: conceptual modelling

Third Workshop planned, Exeter 2010-11-15/17,

- Propose third major theme: observations

# OGC Structures

Board of Directors (25) , Staff (16) , Members (400)

Strategic Member Advisory Committee

OGC Architecture Board (OAB)

Programmes:

- Specification

- Interoperability

- Outreach & Adoption

Planning Committee – quarterly, closed

Technical Committee – quarterly, open conference

Standing Subcommittees:

- Documentation,

- Naming Authority,

- Compliance Interoperability & Testing Evaluation (CITE)

SWG Standards Working Groups – ‘vertical’ (24)

- Short life, for duration of creation/change of standard

DWG Domain Working Groups – ‘horizontal’ (27)

- Met Ocean

- Hydrology

- Aviation
