

# Climate Scenarios for Scientist: the MED-Cordex solution

[www.medcordex.eu](http://www.medcordex.eu)

Marcello Petitta [marcello.petitta@enea.it](mailto:marcello.petitta@enea.it)

with contributions from

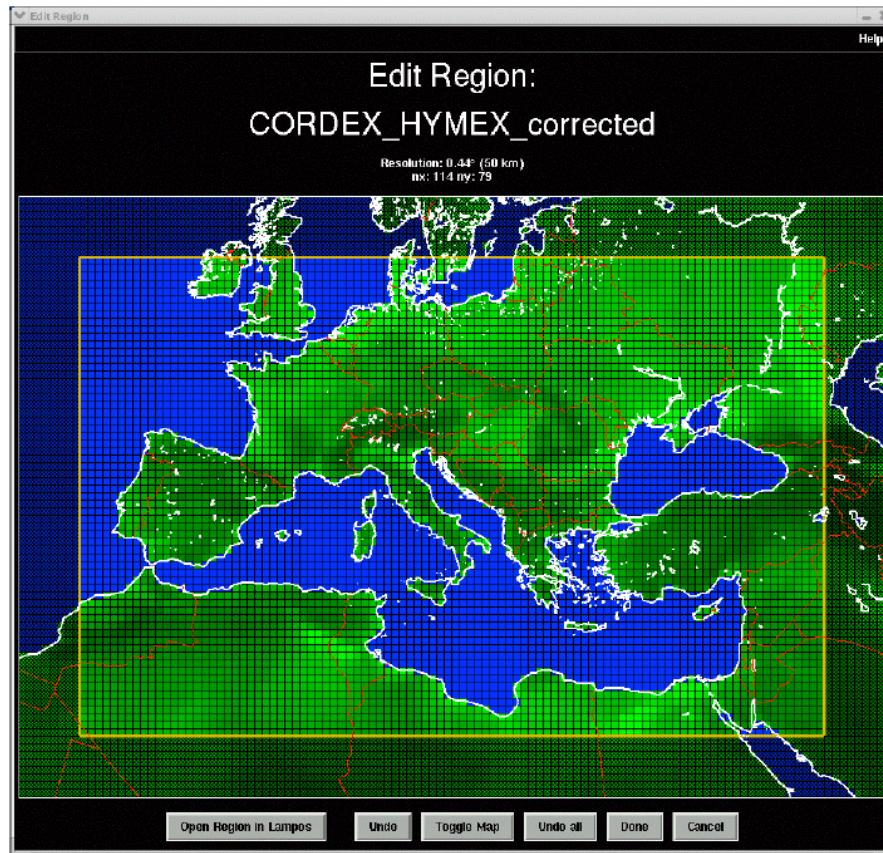

Alessandro dell'Aquila, Sandro Calmanti, Emanuele Lombardi

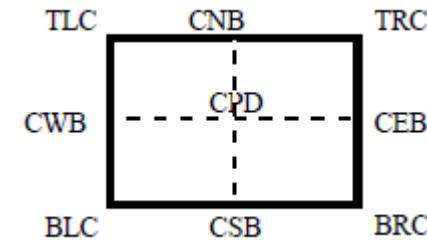

# What is Med-CORDEX

- *Med-CORDEX is a coordinated contribution to the Coordinated Regional Downscaling EXperiment ([CORDEX](#))*
- *Med-CORDEX is supported by [HyMeX](#) and [MedCLIVAR](#) international programs.*
- *Med-CORDEX takes advantage of fully coupled ocean-atmosphere **Regional Climate System Models (RCM)**.*

# Med44-CORDEX domain

## Domain definition

TLC (339.79; 50.65)  
CNB (15.0; 56.66)  
TRC (50.85; 52.34)  
CWB (348.12; 38.35)  
CPD (15.75; 43.02)  
CEB (43.41; 39.70)  
BLC (353.96; 25.63)  
CSB (16.22; 29.39)  
BRC (38.33; 26.73)

From the *CORDEX domain document*  
([http://www.medcordex.eu/cordex\\_domains\\_250610.pdf](http://www.medcordex.eu/cordex_domains_250610.pdf))

# Participating models

## **9 Atmosphere-only 50-25 km RCM**

*RegCM3, RegCM4, ALADIN, REMO, LMDZ, EBU, WRF, COSMO-CLM, PROMES*

## **4 Atmosphere-only 10-20 km RCM**

*RegCM4, ALADIN, WRF, COSMO-CLM*

## **8 Ocean-only regional models**

*MITgcm, NEMOMED8, MPIOM, NEMOMED12, MOSLEF, POM, INST-MED, NEMO-MFS*

## **12 Fully coupled RCMS (at least ocean-atmosphere)**

*ENEA, MPI, CNRM, LMD, Univ. Belgrade, MORCE-MED, UCLM/UPM, INSTM, COSMO-CLM, UAH, IC3, CMCC*

## **6 GCMs used for the scenario runs**

*CNRM-CM5, IPSL-CM5, HadGEM, MPI, CMCC, EC-Earth*

# Core Simulations

- Atmosphere-Land only
- 50 km over the MED-44 CORDEX domain
- Evaluation run (ERA-Interim driven runs, 1989-2008 minimum)
- Historical runs (1981-2005 minimum, 1950-2005 advised, GCM driver)
- Scenario runs (RCP8.5, RCP4.5, 2011-2040 or 2041-2070 minimum, 2006-2100 advised)

# Usage statistics (March 2, 2015)

- The archive contains **113.964** data files for a total of **3.118 GB**
- have been downloaded **118.069** data files for a total of **5.375 GB**
- **63** Med-CORDEX users (scientists)

# Med-CORDEX flow

**Data providers upload their netcdf files**

**Automatic procedure** ingests uploaded netcdf files: move them into their proper path, adds their info into the database, updates info on the web site

**Data users** browse the web site to discover the files they are interested in and download them

# Med-CORDEX users

**Data providers ask by mail for the role and for the credentials**

**Data users:**

**Registered users receive their credential upon request on the web site**

**HyMeX users use their own HyMeX mistral credentials  
(any HyMeX user can get/use Med-CORDEX files without any permission)**

# uploading files

Data providers upload data using ANY ftp client

ftp	ftp://user:passw@www.medcordex.eu	
cd	/incoming_MEDCORDEX/\$INST	
mput	*.nc	(all files into the same flat dir)
put	PLEASEgo.txt	(any size, also empty)

where \$INST is the code of their institution (eg: ENEA)

Then they wait for the automatic daily procedure to start

# ingesting files

Every day at 20:00 (Rome) the “ingesting procedure” starts

- For each dir **/incoming\_MEDCORDEX/\$INST** with **PLEASEgo.txt**:
  - for each other file in the dir, the procedure:
    1. verifies it's a netcdf file ncldump -h works properly
    2. splits filenames in tokens and checks their compliance to CORDEX standard
    3. checks validity of variable name it is already known
    4. creates the right \$PATH in /
    5. moves the file into its \$PATH
    6. inserts/updates the file's record in the db also ncldump -h

# **ingesting files**

**When data provider's files are all processed a mail is sent to him/her with the log of what happened ingesting his/her data**

**After ingesting all files of all data providers, the procedure computes some statistics and publishes them on the web site taking figures from db & ftp logs**

## downloading files

- **FTP Server** can be accessed by any ftp client as wget)
- **TDS Thredds Data Server** [www.medcordex.eu/tds](http://www.medcordex.eu/tds)
- **Interactively** [www.medcordex.eu](http://www.medcordex.eu)

	Upload	Download	ftp	TDS	Interact.
data providers	U		X		
		D	X	X	X
authorized users		D	X	X	X
HyMeX users		D	X	X	X

# User experience

**MEDCORDEX data base: search**

The field values are only those present in the database. If, for example, in the "org" field the value ENEA is not present it means that ENEA didn't upload any file yet.

**search fields**

Realm	any
variable	any
org	any
Domain	any
GCModelName	any
CMIP5ExperimentName	any
CMIP5EnsembleMember	any
RCMmodel	any
Frequency	any
file name free search	
from YYYY-MM-DD	
to YYYY-MM-DD	

**actions**

show the total size and the number of files

Med-CORDEX validation (*Dell'Aquila et. al, in preparation*)

# Potential interest for end-users

- 207 atmosphere-ocean-soil variables including

**Total evapotranspiration**

**Incoming radiation**

**Specific Humidity**

**Soil Moisture**

**Precipitation**

**Snowfall**

**Snow area fraction**

**Temperature**

**Wind Speed**

**Oceanic currents**

**Sea surface height**
