
Using EMCWF's forecast to successfully predict and issue warnings for severe storms in Iceland.

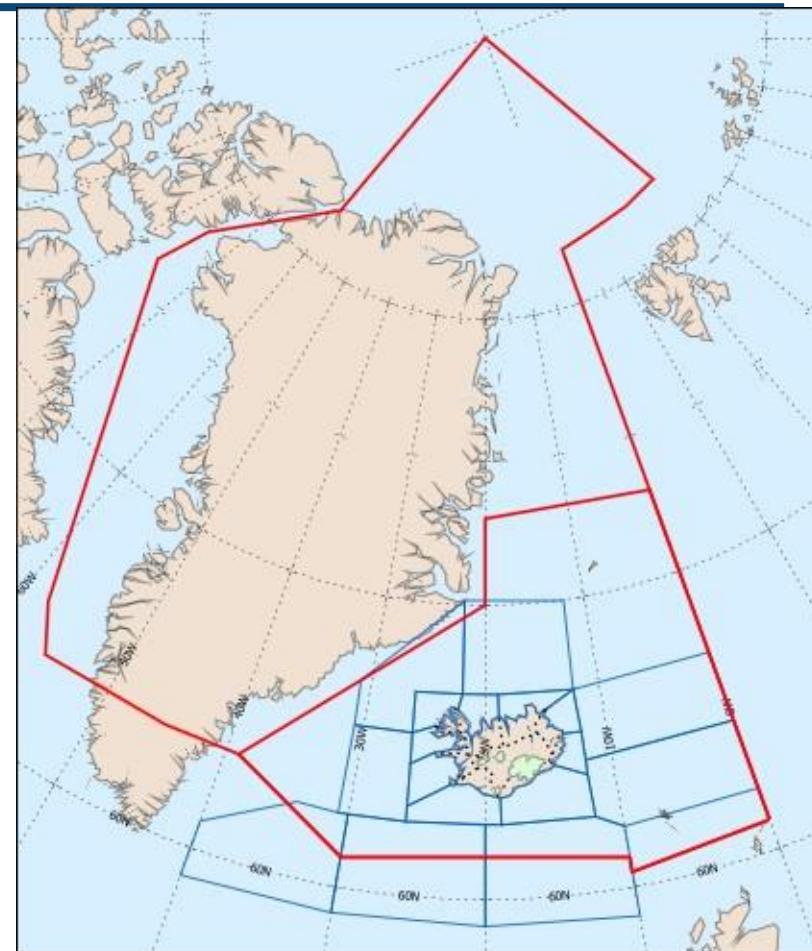

The forecasters view

Helga Ívarsdóttir, Bolli Pálason and others from the Icelandic Meteorological Office

Responsibility of the meteorologist on duty

- ▶ Monitoring and issuing forecasts and warnings for
 - ▲ land and sea
 - ▲ a large flight control area

- ▶ Consulting and communication with
 - ▲ avalanche/flood specialists
 - ▲ civil protection and rescue teams
 - ▲ media
 - ▲ Aristotle project

Possibility of storms

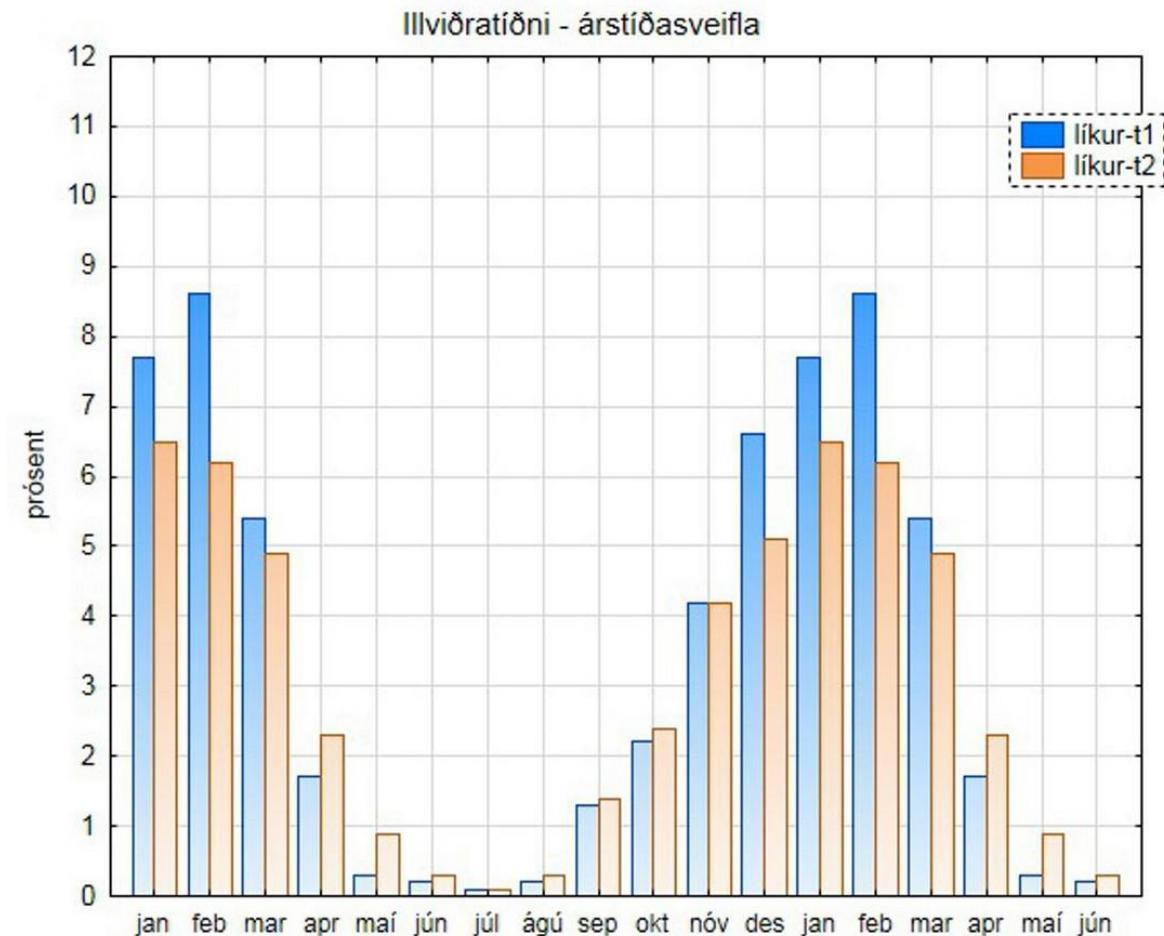

Sample: 1949-2016

t1: W>20 m/s in ¼ of selected weather stations

t2: 24h mean wind in selected station in populated areas >10,5 m/s

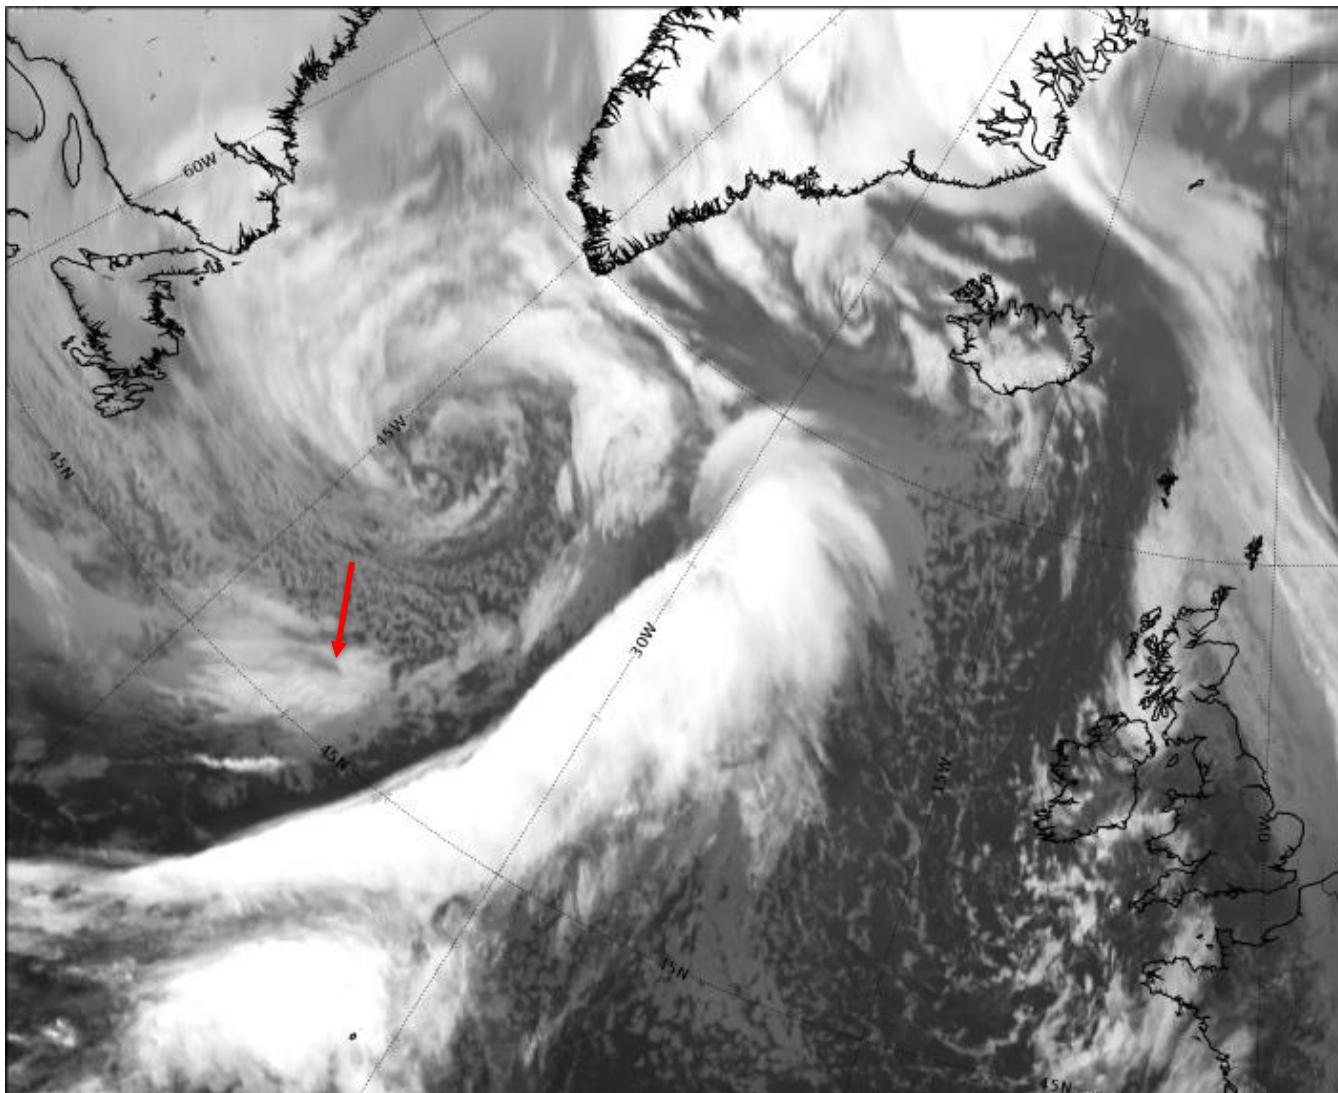

Winter 2016-2017

- t2 = 7 days (2 in may)

Forecast for Wednesday 08. February 2017

Severe weather forecast

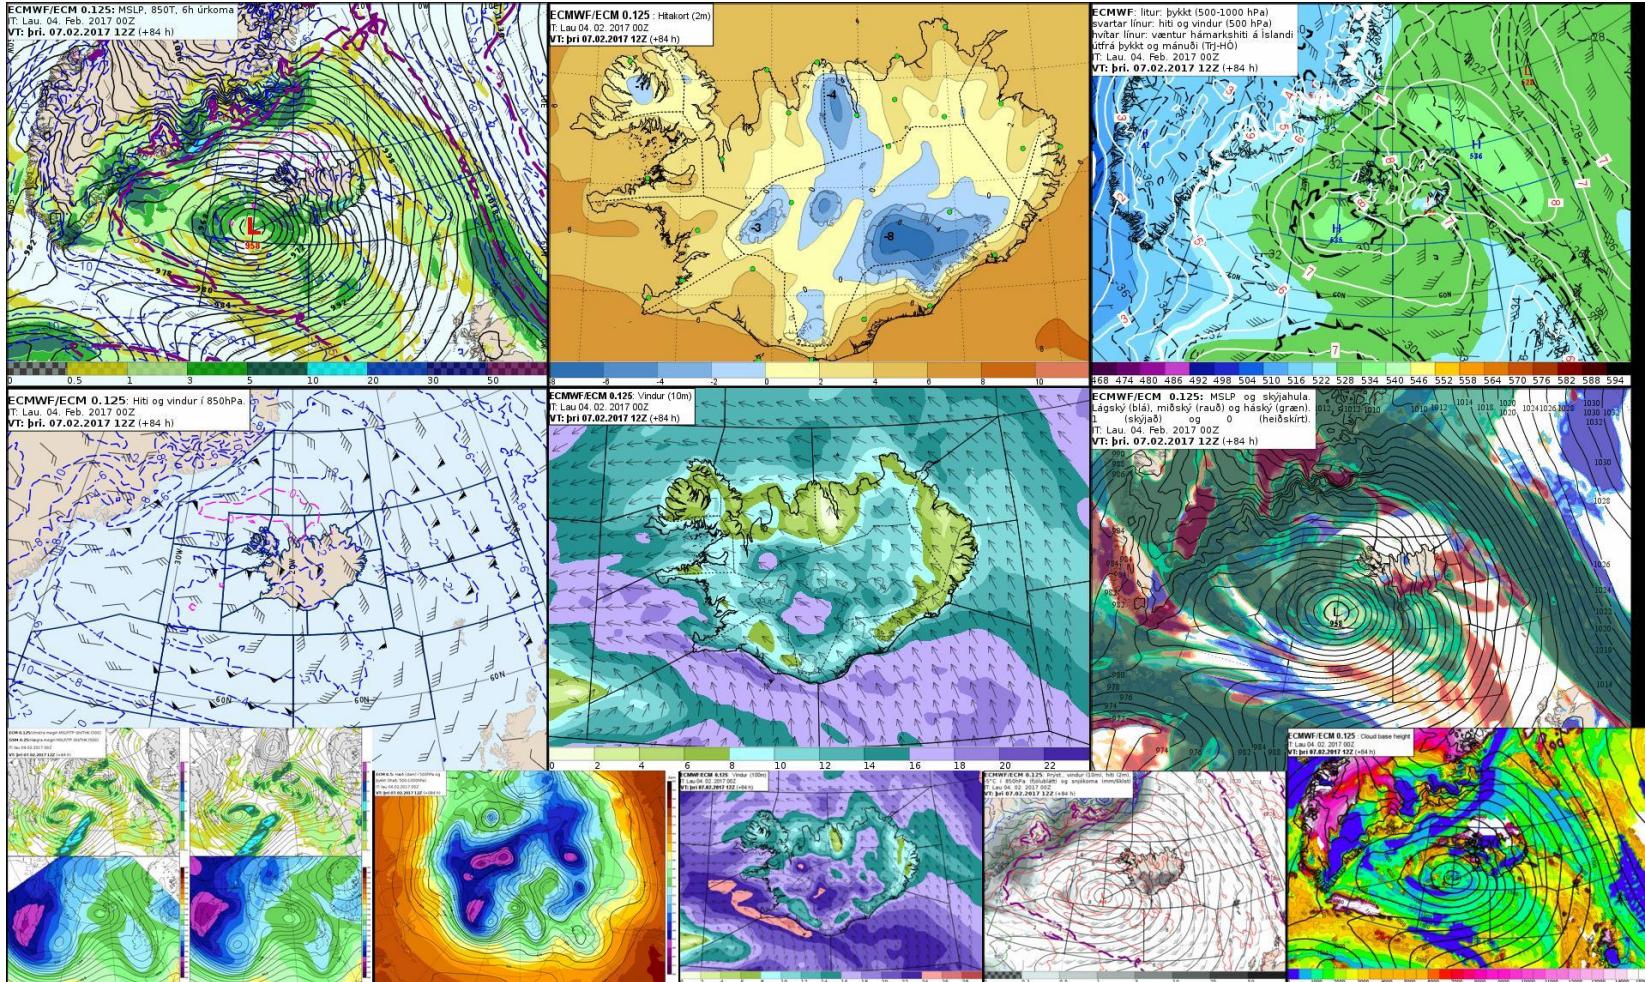

- ▶ Gale warnings are issued from IMO if windspeed exceeds 20 m/s

Date	Lead time	Forecast	
03.02.2017	120 h	Gale	15-20 m/s
04.02.2017	96 h	Strong gale	18-23 m/s
05.02.2017	72 h	Strong gale	18-23 m/s
06.02.2017	48 h	Storm	20-25 m/s
07.02.2017	24 h	Violent storm	23-30 m/s

Thank you!

Summary

- A good professional collaboration
- The weather forecast reached the public
- Minimal damage

@Eyþór Jóvinsson
